INTRODUCTION

2023

The INTEX family of companies is dedicated to developing and manufacturing the highest quality products that not only provide the best value in price, but are innovative, fun and exciting. The 100+ independently owned and locally operated companies that make up the INTEX Family all embrace this commitment to quality, service and price while working together to ensure the satisfaction of the families and individuals in countries across the globe who enjoy these products. This has become the hallmark of INTEX around the world.

INTEX is committed to delivering top quality products at a great value. Our Airbed line is unmatched for breadth and beauty. With our innovative, patented Fiber-Tech™ Technology, we have engineered a way to combine durability with exceptional comfort, creating airbeds that rival the stability, support and comfort of a traditional mattress.

Our Comfort Rest® line of airbeds is designed to meet all your customers' needs: the "Dura-Beam® Standard Series" offers a line of durable and comfortable airbeds with attractive opening price points. "Dura-Beam® Plus Series" features a wide variety of premium quality raised airbeds. "Dura-Beam® Deluxe Series" offers a line of luxurious raised airbeds with enhanced sleeping surfaces. Our top-of-the-line "PremAire® Airbeds" bring a new level of luxury and innovation to our collection. Elegantly designed with puncture resistant laminated PVC exterior, plushy pillow top and superb structural durability, PremAire® Airbeds offer unparalleled comfort. The "Camping" series is engineered for camping, travel, and all-around rugged use, with mats perfectly suited to the outdoor environment. And for the young at heart, our "Air Furniture" series comes with bright colors and fresh design concepts, guaranteed to attract a loyal following of young adults!

Ask your INTEX representative for any of our product catalogs - we are confident that you will agree that INTEX's product line is unmatched in meeting your needs.

Unitex Service (France) S.A.S., France

Intex Administration Building Landscape, Xiamen, China

Intex Manufacturing and Distribution Complex, Xiamen, China

Commitment to Excellence

All products with the Air Lock™ icon are quality tested to be air tight before they leave our factory

INTEX is committed to delivering the highest quality products that meet or exceed the expectations of our customers. Our vision is to be the most recognizable, trusted and innovative company in our industry.

We understand that product safety is essential to upholding our consumers' trust and expectations.
That's why we keep quality and safety in mind with every product we produce. In addition to meeting all safety and quality regulations and standards, we set our own rigorous standards and challenge ourselves to continuously improve and exceed them.

Examples of regulations and standards we conform to include:

- Regulation (EC) No.1907/2006 "Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)"
- Regulation (EU) No. 2011/65 "Restriction of the use of certain Hazardous Substances in electrical and electronic equipment (RoHS)"
- Regulation (EU) No. 2012/19 "Waste Electrical and Electronic Equipment (WEEE)"
- EN 60335-1: Safety of household and similar electrical appliances — General requirements
- ASTM F2755: Standard Safety Specification for Cautionary Labeling of Inflatable Air Mattresses
- UL1450 "Electric inflators" (USA standard for electric inflators)

INTEX's commitment to excellence extends to helping our environment and keeping sustainability in mind through every step of the manufacturing process. Our manufacturing waste repurposing program prevents used materials and scraps from going to landfills and instead they are re-used in the manufacturing process where up to 10% of annually produced PVC is recycled.

INTEX designs all of our own packaging for our products. We constantly challenge our methods of packaging to improve efficiency and reduce waste. More compact packaging techniques save cardboard while cutting down on space utilization, saving freight and fuel consumption. As a manufacturer, INTEX knows it has a responsibility to manage the amount of waste produced. As an employer of over ten thousand people, we also encourage our own employees to recycle, reduce waste, and be consciousof the environment. INTEX has made significant investment in technology to reduce energy consumption. For example, we have implemented a frequency converter system which converts diesel to natural gas, installed solar water heaters and set up a recycled sewage system, and invested in equipment that reduces gas emissions.

From product design, to more efficient processes that save energy and reduce waste, to more energy efficient offices, the people at INTEX are striving to provide the best value products anywhere while constantly improving our sustainability efforts.

INNOVATIVE FIBER-TECH™ TECHNOLOGY by INTEX®

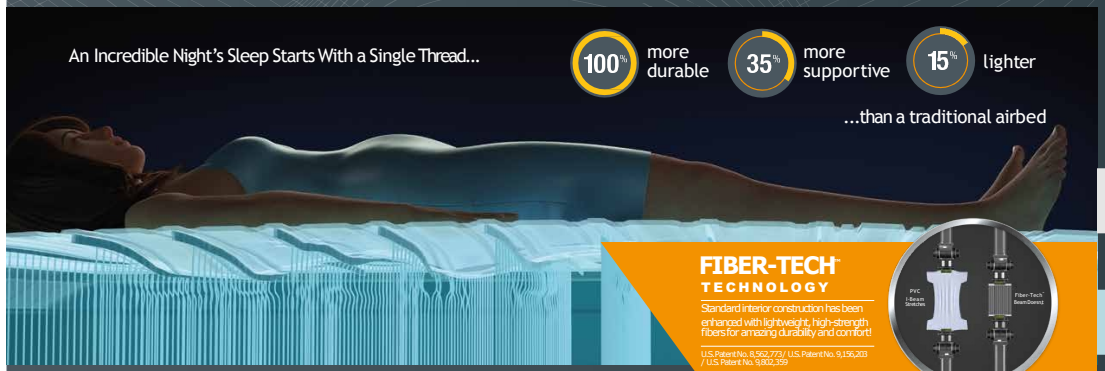
An Incredible Night's Sleep Starts With a Single Thread...

100% more durable

35% more supportive

15% lighter

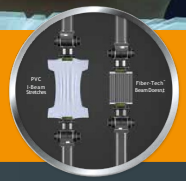
...than a traditional airbed



FIBER-TECH™ TECHNOLOGY

Standard interior construction has been enhanced with lightweight, high-strength fibers for amazing durability and comfort!

U.S. Patent No. 8,562,773/ U.S. Patent No. 9,156,203 / U.S. Patent No. 9,802,359



Designed for Comfort Engineered for Durability

Our innovative, patented Fiber-Tech™ Technology airbeds are comprised of thousands of high-strength polyester fibers. Unlike traditional airbed construction, these high-strength polyester fibers do not stretch over time, resulting in amazing durability for years of lasting comfort. Fiber-Tech™ interior construction provides the ideal firmness for superb support and rejuvenating sleep.
